

University of Sadat City
Faculty of Veterinary Medicine
Master Program Specification
(2014-2015)

**Program Title: Master in Veterinary Medical Sciences
(Infectious Diseases)**

A. ADMINISTRATIVE INFORMATION

University:	Sadat City
Faculty:	Veterinary Medicine
Program title:	Master in Veterinary Medical Sciences (Infectious Diseases)
Final award:	MVSc Degree (Infectious Diseases)
Registration period	2-4 years. An extension for a maximum of 2 years could be approved.
Department responsible:	Medicine and Infectious Diseases
Program Coordinators	Dr. Mohamed Nayel
External evaluator:	Prof Dr./Adel Khader, Alex University

B. PROFESSIONAL INFORMATION

1) Overall aims of program

- Provides graduates the opportunity to develop communication and teaching skills and the experience of scientific research.
- Develops the ability of graduate to deal with recent techniques and diagnostic tools in the field of Infectious diseases.
- Supplies the graduates with the most recent knowledge in science and technological applications in Infectious diseases.
- Demonstrates an awareness of the connections between disciplines and develop the ability to deal with scientific literature and to review and make presentation of research data.
- Allows graduates to develop practical research proposals.
- Enables graduates to achieve competency in modern laboratory techniques.

2) Academic standards

Academic reference standards (ARS) adopted by the faculty committee No 152 (18-6-2014).

3) Graduate attributes

Upon successful completion of the program, the graduate has the ability for:

- (1) Efficient application of the basics and methodologies of scientific research and using its different tools to do his master thesis and subsequent research work and field studies.
- (2) Using the analytical protocols of animal Infectious diseases problems.
- (3) Integrating specialized knowledge with related information about animal Infectious diseases aspects and extrapolating their interrelationship.
- (4) Showing awareness about outbreaks of animal Infectious diseases and problems of diagnosis, treatment and prevention of it. As well as new theories in the field of animal Infectious diseases.
- (5) Identification of problems and difficulties in diagnosis, treatment and prevention of animal Infectious diseases and suggesting innovative solutions.
- (6) Using the diagnostic tools in the field and modern diagnostic techniques in the laboratory efficiently and able to perform wide range of treatment and control techniques.
- (7) Communicating effectively with the work team and leading it.
- (8) Taking suitable decision depending on the available data
- (9) Using the available resources to diagnosis, treatment, and control of animal Infectious diseases and save the available resources.
- (10) Awareness with his role in society development and community preservation in the light of global and regional variations through his effort of diagnosis, treatment and control of animal Infectious diseases and animal wealth save.

- (11 Dealing with public, farmers, owners and academic communities with integrity, credibility and the rules of veterinary Infectious and research.
- (12 Continuous self-learning and long life updating of knowledge and development of all aspect of animal Infectious diseases and related aspects.

4) Intended learning outcomes of course (ILOs)

a) Knowledge and understanding

By the end of this program the graduate should be able to:

- a.1. Recognize basic principles and theories of Infectious diseases in addition to diagnosis and control of infection.
- a.2. Identify mutual effect between Infectious diseases and its impact on environment.
- a.3. Recognize progress in the scientific field of Infectious diseases especially epidemiological mapping and molecular control.
- a.4. Identify legal and ethical basics in veterinary practice in the field during handling of diseased animals.
- a.5. Realize the principles and basics of quality assurance methods in diagnosis, treatment and prevention as well as epidemiological description of animal Infectious diseases.
- a.6. Realize the legal and ethical basics in of scientific research

b) Intellectual skills

By the end of this program the graduate should be able to:

- b.1. Analyze and judge the data collected from the field and by laboratory investigations.
- b.2. Use his experience for solving mystery of animal infectious problems even in scarcity of data.
- b.3. Relate the case history, clinical findings to the laboratory findings in order to reach perfect diagnosis and control of Infectious diseases.
- b.4. Participate in preparing research plan in Infectious diseases and write scientific article on a research problem.
- b.5. Assess risks of professional practices in Infectious diseases and their possible consequences.
- b.6. Plan for improvement of professional performance
- b.7. Make professional decisions in dealing with laboratory diagnostic problems.

c) Professional and practical skills

By the end of this program the graduate should be able to:

- c.1. Master basic and recent professional skills in detection, diagnosis, epidemiology and control of infections.
- c.2. Write, conclude and evaluate reports about different Infectious diseases
- c.3. Judge existing materials and methods in Infectious diseases.

d) General and transferable skill

By the end of this program, the graduate should be able to:

- d.1.** Communicate effectively with his professors, collages and animal owner(s).
- d.2.** Use information technology to serve the professional practice.
- d.3.** Assess himself and identify his personal educational needs.
- d.4.** Utilize different sources of knowledge and information.
- d.5.** Demonstrate an ability to learn independently for a career of lifelong learning.
- d.6.** Demonstrate interpersonal skills and team working ability
- d.7.** Manage time efficiently.
- d.8.** Set tools and indicators for assessment of the performance of others.

5) Program structure:

a) Premaster courses – at least one academic year

	Lecture (hours/week)	Practical (hours/week)
Fundamental (core) course	3	4
Research methodology	1	3
3-4 Elective Courses (10-12 hours)	Offered by other departments and are selected from the list below according to thesis topic	

b) MVSc Thesis (at least one academic year)

- All master-degree students should prepare a master thesis.
- The department and the ethical committees must approve the protocol of the research.
- The thesis should include a review part and a research part.
- The thesis is supervised by one or more senior staff members of the department responsible for the program and may include other specialties according to the nature of the research.
- The thesis should be evaluated and approved by a committee of three professors including one of the supervisors and an external professor.

Elective Courses for master students				
Code	Course	Hours/week		Department
		Lecture	Practical	
601	Applied anatomy	2	2	Anatomy & Embryology
602	Arterial & nerve supply, and surface anatomy	2	2	
603	Osteology and arthrology	2	2	
604	Comparative digestive system	2	2	
605	Comparative urogenital system	2	2	
606	Comparative respiratory System	2	2	
607	Comparative cardiovascular system, lymphatic system and heart	2	2	
608	Comparative nervous system and endocrine glands	2	2	

609	General and special embryology	2	2	
610	Avian anatomy	1	2	
611	Cytology and cytochemistry	2	2	Cytology and histology
612	General histology	2	2	
613	Histological and histochemical structure of blood, lymphatic & cardiovascular systems and heart	2	2	
614	Histological and histochemical structure of respiratory system	2	2	
615	Histological and histochemical structure of digestive system	2	2	
616	Histological and histochemical structure of urogenital system	2	2	
617	Histological and histochemical structure of nervous system and endocrine glands	2	2	
618	Histological and histochemical structure of integument, hoof, claws and nails	2	2	
619	Avian histology	2	2	
620	Circulatory and immune systems	2	2	
621	Physiology of endocrine glands & reproduction in mammals	2	2	Physiology
622	Avian physiology (advanced)	2	2	
623	Fish physiology	1	2	
624	Nerve and muscle physiology	2	2	
625	Ruminant physiology	2	2	
626	Physiology of environment, adaptation, and cell	2	2	
627	Physiology of blood and immunity system	2	2	
628	Physiology of digestion, metabolism and energy	2	2	
629	Physiological changes associated with pollution	1	2	
630	Physiology of endocrine glands & reproduction in mammals	2	2	
631	Biochemistry (advanced)	2	2	Biochemistry and Chemistry of Nutrition
632	Metabolism	1	2	
633	Biochemistry of tissues and body fluids	2	2	
634	Biochemistry of hormones and reproduction	2	2	
635	Chemistry of nutrition	2	2	
636	Clinical biochemistry	2	2	
637	Avian biochemistry	2	2	
638	Fish biochemistry	2	2	
639	Microbial biochemistry and biotechnology	2	2	
640	Radiation biochemistry	1	2	
641	Behaviour and management of ruminants	2	3	Husbandry and Animal Wealth Development
642	Behaviour and management of equines	2	3	
643	Pet animal behaviour and management	1	2	
644	Laboratory animal behaviour and management	1	2	
645	Wild animals and birds behaviour and management	2	2	
646	Bird and rabbit behaviour and management	2	2	
649	Animal nutrition (advanced)	2	2	Nutrition and Clinical Nutrition
650	Feed stuffs (components and additives)	2	2	
651	Farm animals and fish nutrition	2	2	
652	Birds and rabbit nutrition	2	2	
653	Nutrition of wild animals	1	2	
654	Laboratory animal nutrition	1	2	
655	Feed stuff analysis	2	2	
656	Feeds and feed industry hygiene	2	2	
657	Clinical nutrition	2	2	

659	General pathology and oncology (advanced)	2	2	Pathology
660	Pathology of microbial and parasitic animal diseases	2	2	
661	Pathology of nutritional deficiencies	1	2	
662	Environmental pathology	1	2	
663	Pathology of reproduction	1	2	
664	Pathology of poultry	2	2	
665	Fish pathology	1	2	
666	Experimental Pathology	1	2	
667	Toxicological pathology	2	2	
668	Surgical pathology	2	2	
669	Clinical pathology (advanced)	2	2	Clinical Pathology
670	Evaluation of organ functions, body fluids balance and urine	2	2	
671	Diagnosis of hematological disorders and bone marrow investigation	1	2	Bacteriology, Mycology and Immunology
672	Bacteriology (general)	1	2	
673	Bacteriology (special)	2	3	
674	Immunology (advanced)	1	2	
675	Mycology (advanced)	2	3	
676	Microbiology of fish	2	2	
677	Microbiology of birds and rabbits	1	2	
678	Microbiology of invertebrates	1	2	
679	Diagnostic microbiology	2	2	
680	General virology	1	2	
681	Special virology	2	2	
682	Viral immunology	1	2	
683	Viral vaccines	2	3	
684	Veterinary medical entomology	2	2	Parasitology
685	Helminthology	2	2	
686	Protozoology	2	2	
687	Parasites of birds	2	2	
688	Parasites of fish	2	2	
689	Snails and their veterinary significance	1	2	
690	Parasitic immunology	1	2	
691	Clinical parasitology	2	2	
692	Parasites of wild animals	1	2	
693	Specific parasitology (advanced)	2	2	
694	Veterinary pharmacology (General Advanced)	2	2	Pharmacology
695	Veterinary pharmacology, autonomic nervous system and local hormones	2	2	
696	Veterinary pharmacology and CNS	2	2	
697	Veterinary pharmacology and anaesthesia	2	2	
698	Veterinary pharmacology and systems	2	2	
699	Veterinary pharmacology and metabolism	2	2	
700	Pharmaceutical hormones	2	2	
701	Chemotherapy	2	2	
702	Drug toxicity	1	2	
703	Biological evaluation of drugs	1	1	
704	Dairy hygiene and control (advanced)	2	2	Food hygiene
705	Dairy microbiology	2	2	
706	Dairy technology and preservation	2	2	
707	Food analysis (specific courses)	2	2	
708	Specific courses in milk contamination and diseases transmitted by milk and hygiene of eggs, oils and fats	1	2	

709	Food poisoning	1	2	
710	Hygiene and control of dairy plants	2	2	
711	Hygiene of slaughter animal	1	2	
712	Hygiene and management of abattoirs	2	2	
713	Meat Hygiene and control	2	2	
714	Bird and rabbit meat hygiene	1	2	
715	Food technology	1	2	
716	Food microbiology	2	2	Food hygiene
717	Microbiology of animal byproducts	1	1	
718	Microbiology of fish and crustaceans	1	2	
718	Meat and fish analysis	1	2	
719	Hygiene and control of meat and fish plants	2	2	
720	General Infectious (advanced)	2	2	
721	Ruminant animal Infectious	2	2	
722	Equine Infectious	2	2	
724	Pet animal Infectious	2	2	Infectious and Infectious diseases
725	Wild animal Infectious	2	2	
726	Metabolic diseases	2	2	
727	Nutritional deficiency diseases	2	2	
728	Dermal diseases	1	2	
		2	2	
739	Forensic Infectious and veterinary regulations	2	2	
740	General toxicology	2	2	
741	Environmental toxicology	2	2	
742	Forensic toxicology	2	2	
743	Clinical toxicology	2	2	Forensic Infectious , Toxicology, ,and Veterinary regulations
744	Gynaecology (specific courses for ruminants, equines and pet animals)	2	2	
745	Andrology (specific courses for ruminants and pet animals)	2	2	
746	Obstetrics and diseases in animals	2	2	
746	Reproduction and immunity	1	2	
747	Artificial insemination in ruminants	2	2	
748	Artificial insemination in equines	2	2	
749	Artificial insemination in birds and pet animals	1	2	
750	Artificial insemination in rabbit	1	2	
751	Embryo transfer	1	2	
752	obstetrics and artificial insemination in wild animals	1	2	
753	General surgery (advanced)	2	2	
754	Special surgery (organs)	2	2	
755	Ophthalmic surgery	2	2	
756	Surgery of the digestive system	2	2	
757	Surgery of limbs and diseases of hoof & claw	2	2	
758	Experimental surgery	2	2	
759	Anesthesiology	1	1	
760	Diagnostic imaging	2	2	

761	Bacterial diseases of poultry	2	2	Bird and Rabbit Infectious
762	Viral diseases of poultry	2	2	
763	Mycotic diseases of poultry	2	2	
763	Parasitic diseases of poultry	1	2	
764	Nutritional deficiency diseases	1	2	
765	Wild and migratory birds diseases	1	2	
766	Rabbits diseases (advanced)	2	2	
767	Prevention in poultry field	2	2	
768	Laboratory diagnosis of poultry diseases	2	2	
769	Farm animal hygiene (advanced)	2	2	Hygiene and Zoonoses
770	Poultry hygiene (advanced)	2	2	
771	Environmental hygiene and pollution	2	2	
772	Combating epidemic diseases	2	2	
773	Control of pests and disease vectors	2	2	
774	Insecticides and animal hygiene	2	2	
775	Animal farm hygiene	2	2	
776	Disinfection and disinfectants	2	2	
777	Epidemiology of animal and bird diseases	2	-	
778	Zoonoses - advanced	2	2	Hygiene and Zoonoses
779	Role of rodents in transmission of zoonotic diseases	2	2	
780	Role of wild animals in transmission of zoonotic diseases	2	2	
781	Epidemiology of zoonotic diseases	2	-	
782	Prevention and control of zoonotic diseases	2	-	
783	Role of aquatic animals and fish in transmission of zoonotic disease	2	-	
784	Genetic of microorganisms	1	2	Husbandry and Animal Wealth Development
785	Genetic engineering (advanced)	1	2	
786	Cytogenetics	1	-	
787	Population genetics (advanced)	2	-	
788	Physiological genetics	2	-	
789	Biochemical and radiation Genetics	1	2	
790	Advanced animal breeding and improvement (advanced)	2	-	Husbandry and Animal Wealth Development
791	Advanced poultry breeding and improvement (advanced)	2	-	
792	Advanced cattle and buffalo production (advanced)	2	2	
793	Advanced sheep and goat production (advanced)	2	2	
794	Advanced poultry production (advanced)	2	2	
795	Advanced rabbit production (advanced)	2	2	
799	Economics of production and dairy farms	2	-	Husbandry and Animal Wealth Development
800	Economics of poultry farms	2	-	
801	Economics of fish farms	2	-	
802	Feasibility studies	2	-	
803	Animal farm management	2	-	
804	Economics of beef production farms	2	-	
811	Microbial aquatic diseases (specific courses)	3	3	Fish Infectious and Management
812	Parasitic aquatic diseases (specific courses)	3	3	
813	Non-infectious aquatic diseases (specific courses)	3	3	
814	Epidemiology of aquatic diseases	2	1	
815	Aquaculture	3	1	
816	Special studies in aquatic sciences	2	2	

6) Teaching and Learning Methods

The program features a variety of teaching approaches for different intended

learning objectives including:

- Lectures
- Practical sessions
- Self-learning activities

7) Student assessment

The program depends on different assessment ways:

a. METHODS:

1- Written examination	For assessment of knowledge, back calling and Intellectual skills
2- Practical examination	For assessment of practical and professional skill.
3- Oral examination	For assessment of knowledge and Intellectual skills
4- Student activities	For assessment of knowledge and general and transferable skills

b. Master Thesis

- Annual reports adopted by the Faculty
- Finally, the assessment of thesis measure the individual student ability to work independently in the field specialization
- Final evaluation and approval by a judging committee of at least three professors including one or more of the supervisors and an external professor. This assesses the ability to write a review article, perform the needed practical steps and to present the results in tables and graphs. In addition, the skills of analysis of results and discussion with previous findings obtained by other authors are also assessed

Assessment of program intended learning outcomes

Tool or method	ILOs
Written	a1-6; b1-3,5,7
Oral	a1,2,5; b2,3,4,6
Practical	b7; c1-3
Assignments	d1-8
Thesis	A2-6; b1-7; c1-3, d1-8

8) 6-Score classification:

Excellent	At least 90% and more
-----------	-----------------------

Very good	At least 80% and less than 90%
Good	At least 70% and less than 80%
Pass	At least 60% and less than 70%
Fail	Less than 60%

9) Program admission requirements

- The Applicant must normally satisfy the Faculty of Veterinary Infectious University of Sadat City general entrance and requirement. The normal minimum entrance qualification for registration at the Faculty on a master's program:
 - Bachelor degree in Veterinary Medical Sciences of one of the Egyptian Universities or hold a degree in Veterinary Medical Sciences equivalent through the Supreme Council of Universities with general grade at least "Good" and at least grade "Very Good" in specialization.
 - Diploma of general grade at least "Good" and at least grade "Very Good" in specialization. The total number of study hours must be not less than 3 weekly in that specialization.

10) Regulations for progression of program

- a) Registration period for the MVSc in Veterinary Medical Sciences is at least 2 years after the approval date by the Faculty council, one year for studying the courses and another for performing research and preparing the thesis. The registration period should not exceed 4 years. An extension for a maximum of 2 years could be approved by the Faculty council depending on the supervisor report approved by the department council and the postgraduate and research committee in the Faculty. The total period must not be more than 6 years.
- b) The general conditions for having a master degree in Veterinary Medical Sciences include:
 - 1) The student should conduct the 5-6 courses proposed by both department council and approved by postgraduate and research committee and Faculty council. The student will entitled to apply for the exam only after meeting attendance rate for each course. These courses must include:
 - Fundamental (core) course offered by the department responsible for the program (lectures: 3 hours/week; practical: 4 hours/week).
 - Research methodology (lectures: 1 hour/week; practical: 3 hours/week).
 - 3-4 elective courses (10-12 total hours/week) offered by other departments and are selected according to research nature.

- 2) The student should pass written, practical and oral exams successfully in all courses. Examination is held twice a year (December and April).
 - Failure or depriving from entering one or more course did not requires reexamination of successful passed courses.
 - Each student has 4 chances to enter the exams, and the Faculty council should deprive the student from entering the exam if his attendance rate in the course is less than 75%.
 - Time of written exam is 3 hours if the total study hours of the course are 3 hours or more per week. In case of a course with total study hours less than 2 per week, the time of written exam is 2 hours
 - The final marks for each course having 3 study hours (lecture and practical) per week is 100 and 50 marks for any course with less than 3 study hours. The marks are divided into 50% for written exam, and 50% for both practical and oral exams.
- 3) The student must prepare a master thesis accepted by the judging committee in an open discussion. The master certificate must indicate the thesis topic and the field of specialization.

c) **General rules**

- 1) Applications for registration should be sent during March and September each year.
- 2) The applicant should submit a request enrolment for the Faculty dean who forwards it to the concerned department council to determine the research subject and the study program and then take calendar after complete documentation on the Faculty council for approval.
- 3) The thesis title should be identified at least 2 months before being submitted, and the judging committee has the right to amend the title without prejudice the subject of research.
- 4) The Faculty council has the right to suspend the student enrolment for a certain period if he has acceptable excuse preventing him from continuing his study or research, and his period will not counted.
- 5) Registration will be cancelled in one of the following cases:
 - If the supervisor report during the registration period is unsatisfactory
 - If student did not submit his thesis before the end of registration period.
 - If the judging and discussion committee rejected the thesis twice.
- 6) The applicant should submit 10 copies of the thesis after its validity is approved by the judging and discussion committee to be distributed to the committee members and Faculty library and the judging and discussion

committee may decide the exchange of the thesis with other universities or printing at the expense of the university.
